Optimax, MyAngkasa to expand professional eyecare services

KUALA LUMPUR: Eye specialist service provider Optimax Holdings Berhad (Optimax) has signed a memorandum of understanding (MoU) with MyAngkasa Holdings Sdn Bhd (MHSB), a wholly owned subsidiary of Angkatan Koperasi Kebangsaan Malaysia Berhad.

In a statement, Optimax said the collaboration will enable cooperative members and their families to access eye care services at Optimax

centres nationwide through the ANGKASA Salary Deduction System, allowing patients to manage treatment costs more conveniently.

Its chief executive officer, Sandy Tan, said the partnership is aimed at widening access to professional eye care services while supporting the group's goal of making quality eye treatment more accessible to Malaysians.

"We are pleased to collaborate with MHSB to expand access to

quality eye care for cooperative members, which aligns with our mission to make high-quality eye care accessible to all Malaysians.

"By reaching over 7 million cooperative members and their families through our network of 24 centres nationwide, we believe this initiative will improve accessibility to professional eye care services while raising greater awareness on eye health within the community," she said.
